in “all in one” roadcase

## FOLDBACK SPEAKERS

2 x single EAW Microwedge speakers

## LIGHTING

Designed by Babekuhl and Sam Whiteside

The philosophy of the lighting design is to approach it as an art installation - giving the room an immediately identifiable aesthetic.

The installation is a geometric grid design made of LED profile strip suspended below the ceiling.

Sculptural in philosophy, the grid (along with all the lights in the room) is controlled centrally, effectively making the whole room a dynamic light installation, capable of strobing, chasing, and animating.

The hazer is a Chauvet Hurricane-Haze 2D Water Based Haze Machine. There will be 6 Chalet Shocker Panel 480 (strobes)

The space also has a built in lighting bar to host any additional lighting required or brought in

## STAGING

The stage is a custom designed pyramid stage built primarily for DJs

The stage is fully flexible and demountable in sections leaving the largest format stage 3500 W x 2200 D x 450 H

There is direct access to the back of stage via the Broadway St side of the rear of the stage

## ACCESSIBILITY

Accessible access is via our rear courtyard

## PROJECTOR

Video file size must be 630w x 1920h

Please let us know if you plan on using our outdoor projector for your event. You will need to supply your custom projection file a week prior to the event uploaded to our Sharepoint link.

## GREEN ROOM

Green room access is via level 2 on the Abercrombie side of the building. The room is fully lockable and is equipped with a full length mirror, kettle and a lounge area for 4 people. Please note that there are camera's in the green room.

## RIDERS

All riders will be negotiated at the timing of booking via the Abercrombie Booking Manager
